Activity Report Log in Chauffeur 2 Demo

→ Wheels checked? YES

→ ADR equipment complete? YES

→ Phone from Vos with You??

NO

YES

Login -

As soon as you are logged in to the boardcomputer, you will now receive an extra question in addition to the 3 standard questions. Namely whether the phone of Vos is present in the truck. You should always have this in the truck, so that it cannot be forgotten. You answer this question with **yes**. If you do not have the telephone with you, answer this question with **no**. A notification of this will also be sent to the office.

Connect the app -

Now you will see the pairing screen to connect to the phone.
Turn on the phone to get started.

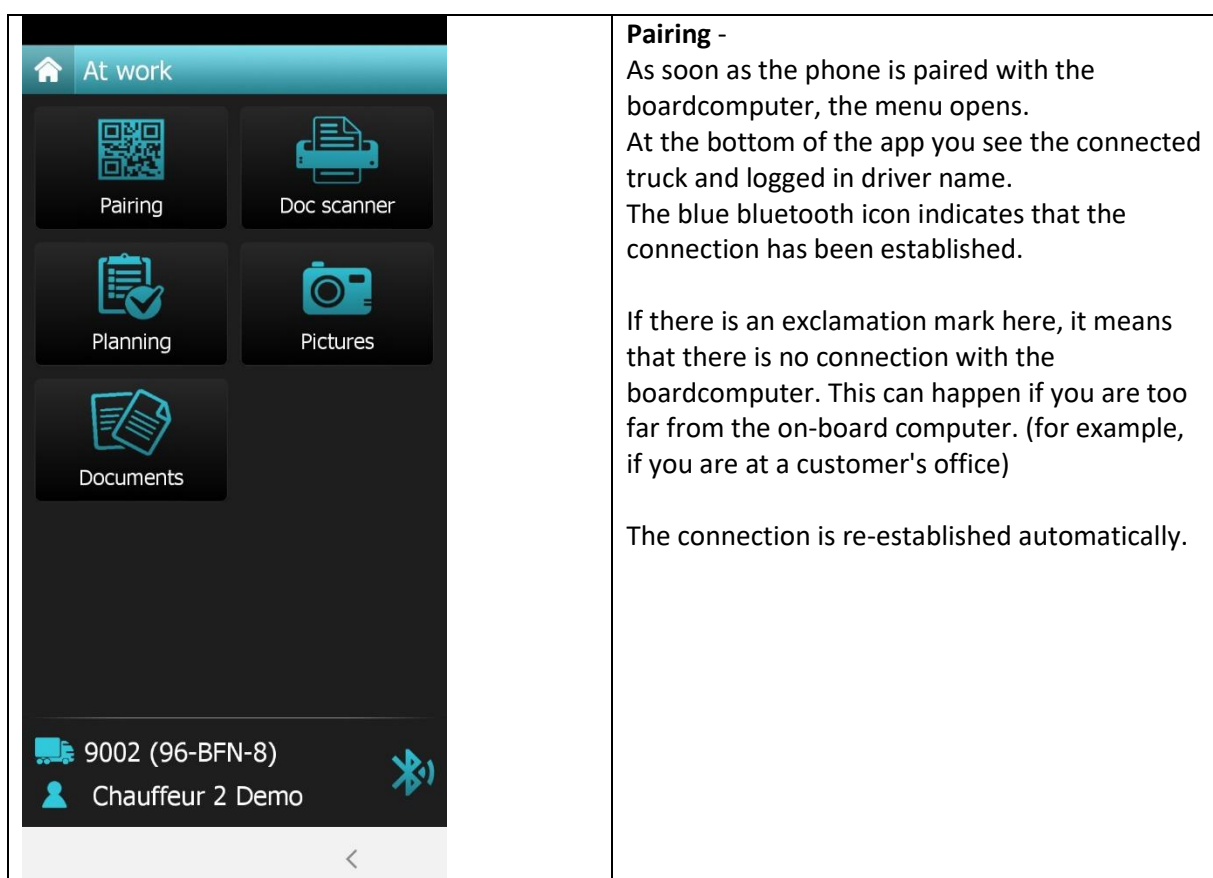

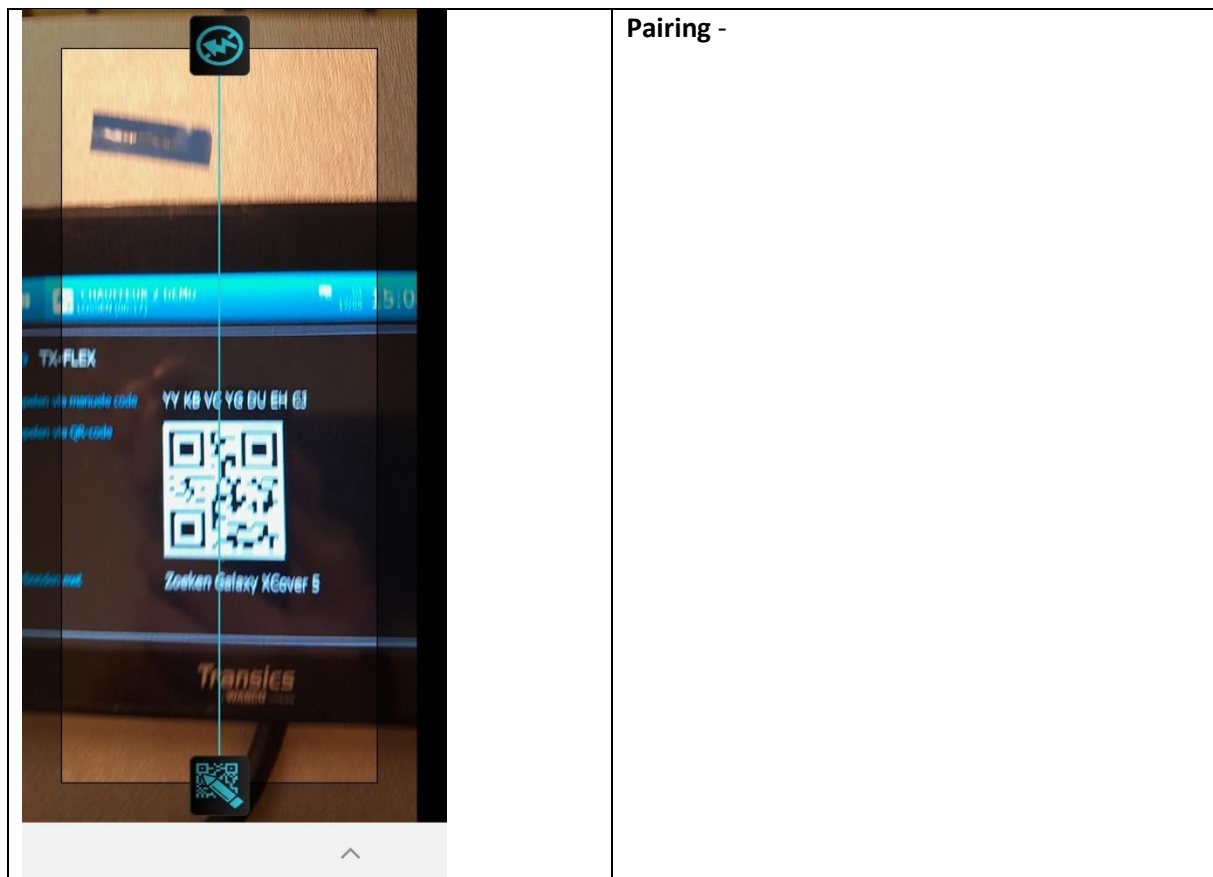

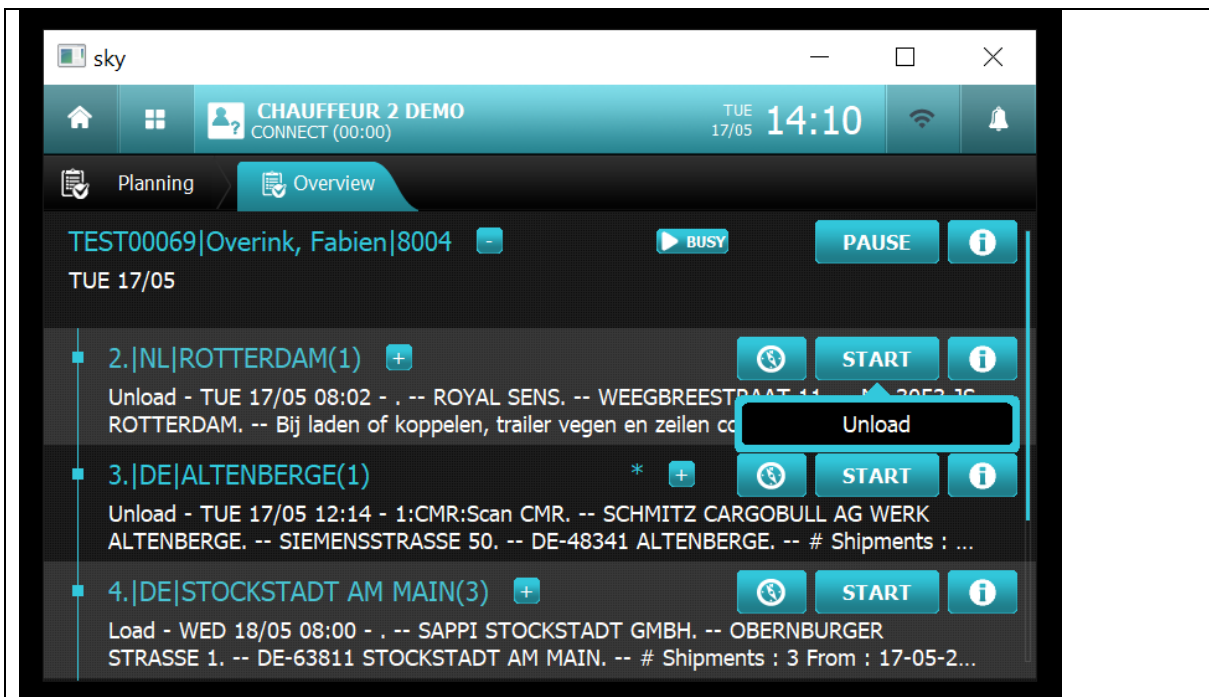

Pairing -

Press the **TX-FLEX** icon to open the app.

	<p>Pairing - Once the transics app has launched, you will see the following options.</p> <ul style="list-style-type: none"> - At work With this option you open the menu with all functions such as planning, photos, document scanner, etc. You can also press pairing to link the phone to the boardcomputer. - Settings With this option you can change a number of settings, such as language. You can also empty the cache here. This can be used if the app is having problems. - Exit With this option you can close the app.
--	---

	<p>Pairing - The first time you open the app, the boardcomputer has to be connected. This opens the pairing screen on the phone.</p> <p>Scan the QR code on the screen of the boardcomputer.</p>
---	---

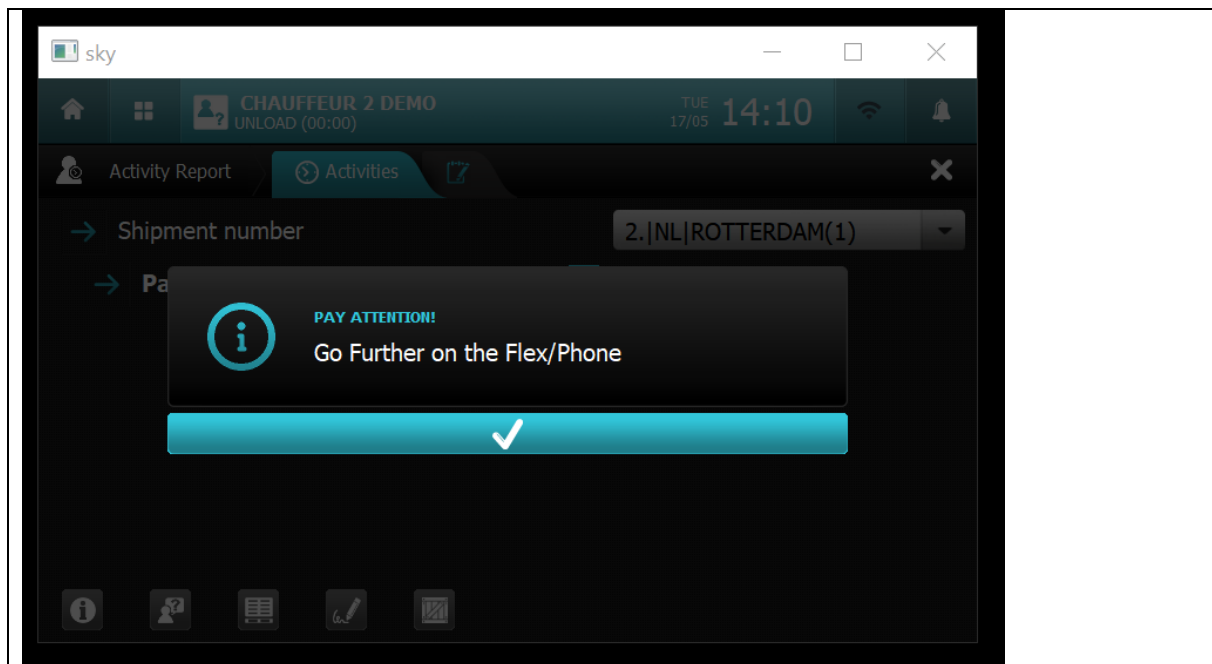

Planning -

As soon as you arrive at the loading/unloading address, press loading/unloading on the boardcomputer.

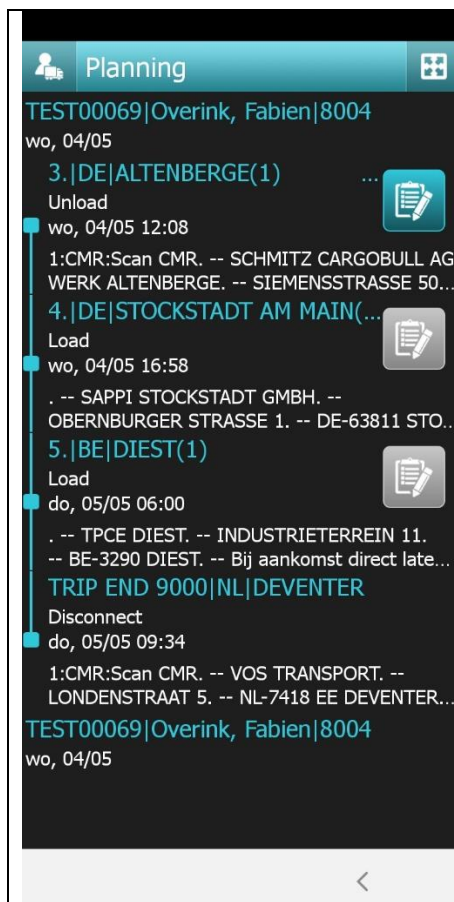

Planning -

A pop-up with information is displayed. This information will also be displayed on the phone.

Planning -

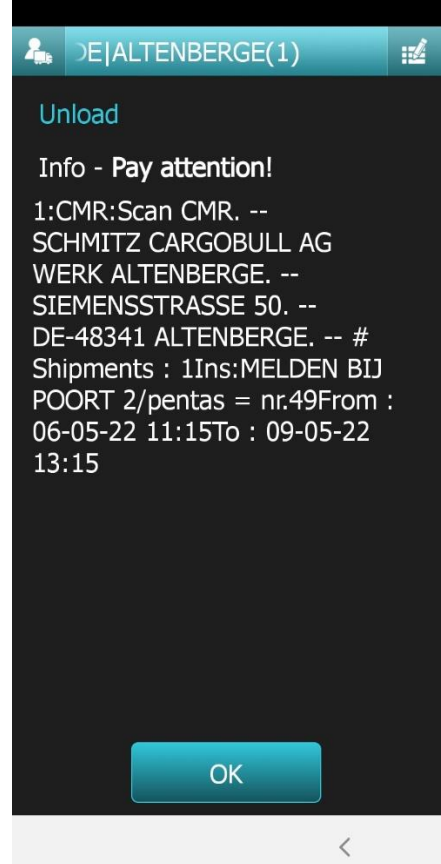

A notification will be shown, indicating that you have to continue on the phone.

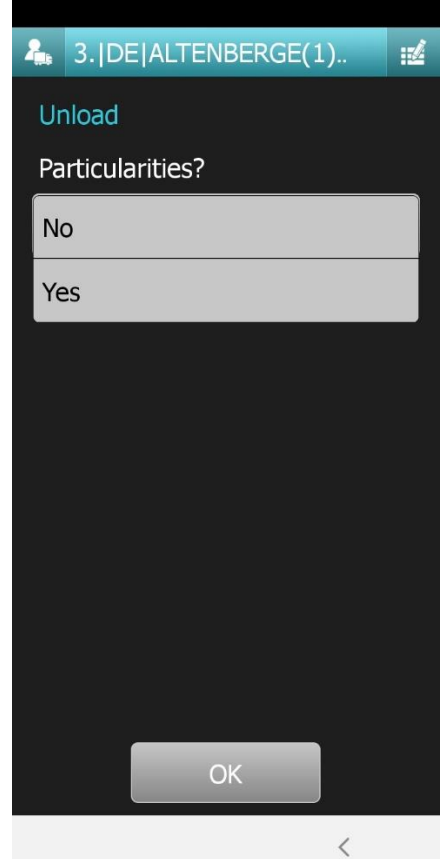

Planning -

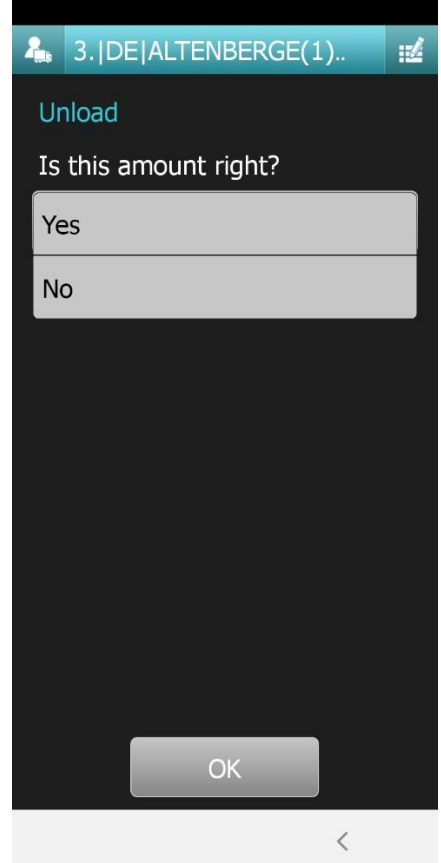

Press the **planning** button in the app to open the planning. You can view all planning here, but only open the active loading/unloading activity. You can see this by the **colored icon**.

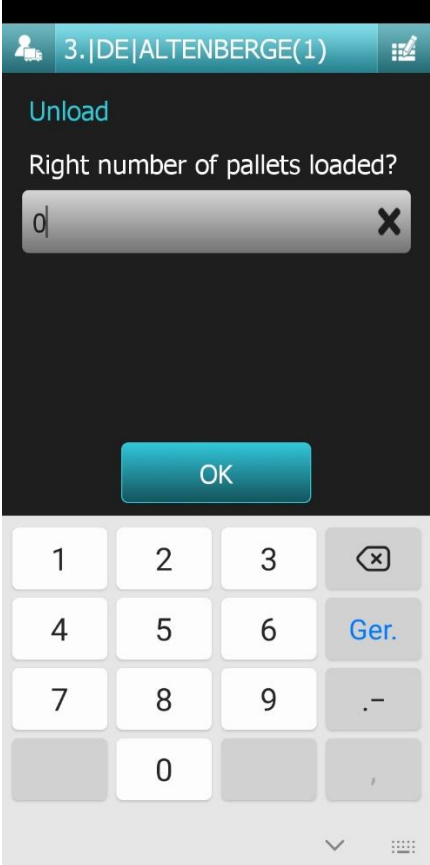

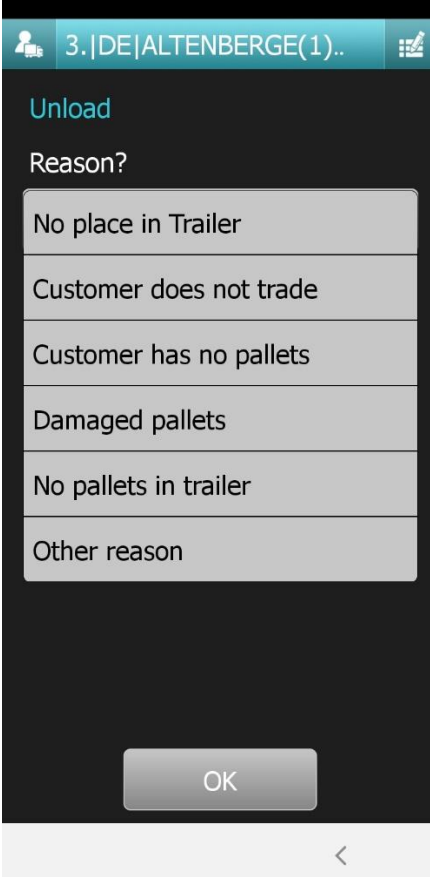

Press the **colored icon** to continue.

	<p>Planning - You will then see some information/instructions. Press OK to continue.</p>
--	--

	<p>Planning - Are there any problems with the shipments? Then answer this question with Yes. You can then indicate what the problems are.</p> <p>If there are no problems, press No.</p>
---	---

 <p>The screenshot shows a mobile app interface with a dark background. At the top, there is a header bar with a person icon, the text 'E ALTENBERGE(1)', and a bar chart icon. Below the header, the word 'Unload' is displayed in blue. Underneath, the text 'Info -' is followed by 'Pay attention on this adress 1 exchange europallets'. At the bottom of the screen, there is a blue button labeled 'OK' and a back arrow icon.</p>	<p>Planning – Exchanging Europallets</p> <p>As soon as euro pallets need to be exchanged, the app will indicate this with an info screen.</p> <p>This contains the number of pallets that must be exchanged.</p>
---	--

 <p>The screenshot shows a mobile app interface with a dark background. At the top, there is a header bar with a person icon, the text '3. DE ALTENBERGE(1)..', and a bar chart icon. Below the header, the word 'Unload' is displayed in blue. Underneath, the text 'Is this amount right?' is followed by two buttons labeled 'Yes' and 'No'. At the bottom of the screen, there is a grey button labeled 'OK' and a back arrow icon.</p>	<p>Planning – Exchanging Europallets</p> <p>After the info pop-up you have to confirm whether the correct number of pallets has been exchanged. Is the number incorrect, or has nothing been exchanged? Then press No.</p>
--	--

	<p>Planning – Exchanging Europallets</p> <p>You can then enter the correct number of exchanged pallets. If nothing has been exchanged, set the number to 0.</p>
	<p>Planning – Exchanging Europallets</p> <p>A reason must then be given to explain why the number is different.</p> <p>You can choose the predefined options, or other reason.</p>

	<p>Planning – Exchanging Europallets</p> <p>If you have chosen other reason, you will see a text field where you can enter a description.</p>
--	---

	<p>Planning – Exchanging Europallets</p> <p>The customer can sign for whether or not to exchange the euro pallets.</p> <p>As soon as you press Sign here, the signature field opens as full screen.</p>
---	---

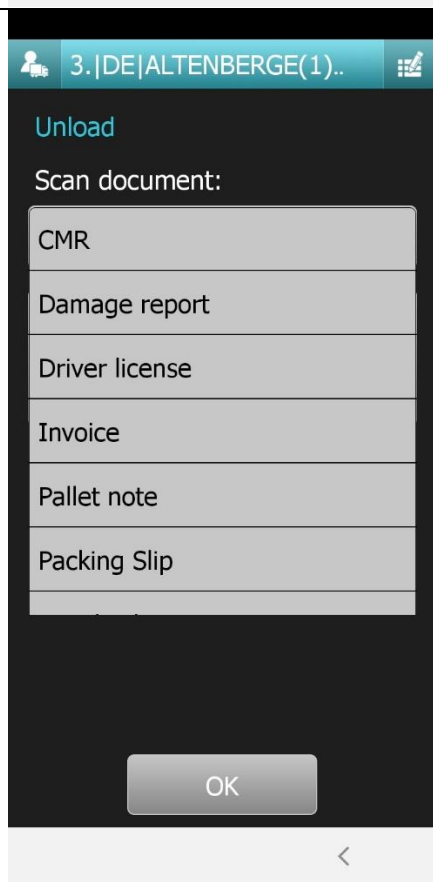

<div><div><div>Signature</div><div></div><div>OK</div></div></div>	
<p>Planning – Exchanging Europallets The customer can then put his signature here. Then press OK to continue.</p>	

<div><div><div>TENBERGE(1)</div><div>Unload</div><div>Signature:</div><div>customer</div><div></div><div>Enter your remark here</div><div>OK</div></div></div>	<p>Planning – Exchanging Europallets Any comments can be entered in the bottom text field.</p>
---	---

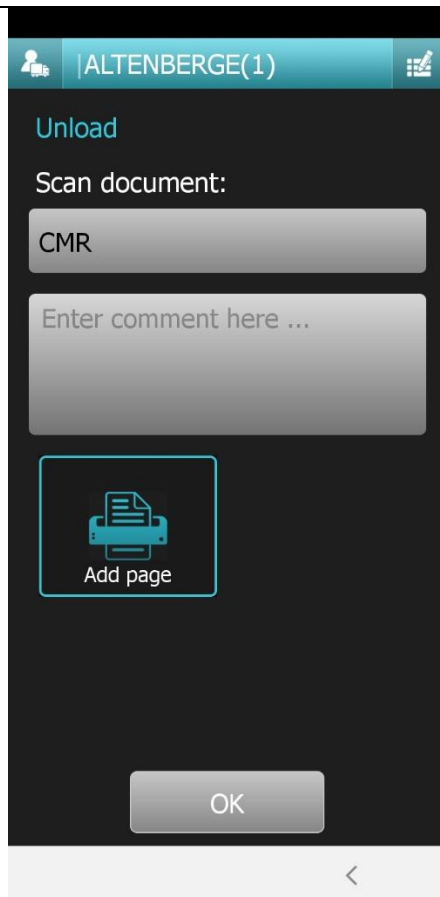

Planning - Scan

If a scan is required, the selection screen opens. Press on the shipment off which you are going to make the scan.

Planning - Scan

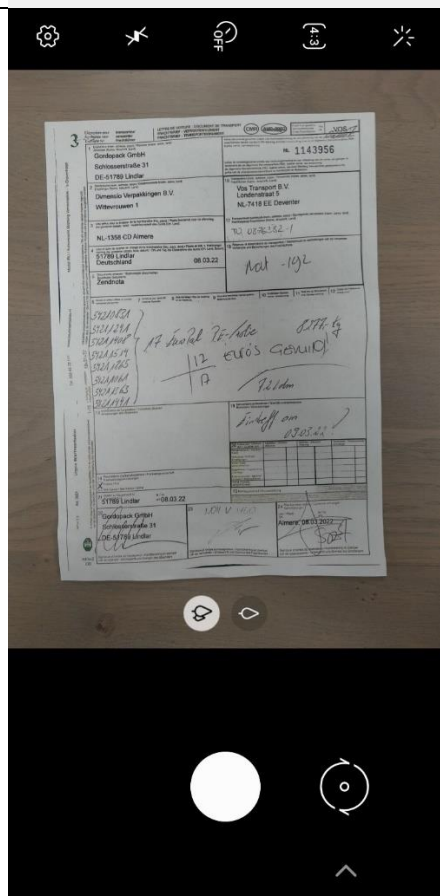

Then specify the type of document.

Planning - Scan

You can add comments if needed.

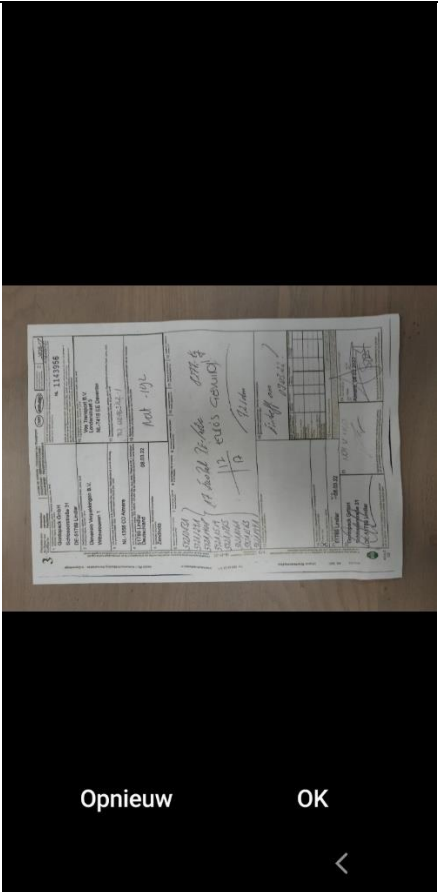

Then press **Add Page** to make the scan.

Planning - Scan

A screen will open where you can take a photo of the document. Make sure that the document is fully displayed. You will get the best results if the document is as flat as possible, without wrinkles, folds, etc.

Press the round button to take the photo.

Planning - Scan
When the entire document is complete/correct, press **OK** to continue. If not, you can retake a photo by pressing the **Retry** button.

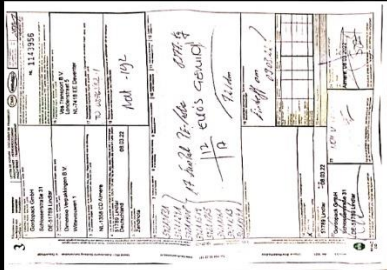

Planning - Scan
The app detects the document and puts a box around it.

You can adjust this frame yourself by pressing and dragging the dots.

You can also rotate the photo if you wish.

If everything is correct, press Next to continue.

Planning - Scan

The app processes the document according to the selected filter at the bottom.

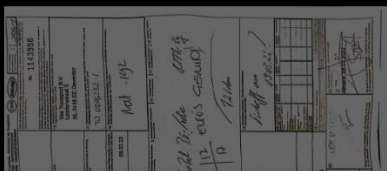

The best result is given by the filter: **Magic Color**

Press the **green checkmark** button on the right to continue.

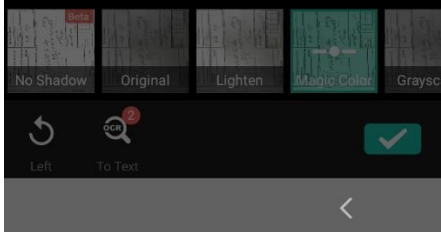

Planning - Scan

The document is being processed and will be added to the app.
